

SEM Executive

In the last year (2016-2017):

- Members of the FFS sub-committee of the SEM Executive have submitted proposals for a new Trauma Team Leader billing code for Emergency and for an Emergency Medicine Resuscitation Code such as that used by Anesthesia.
- Members of the APP sub-committee of the SEM Executive successfully submitted to the Allocation Committee a detailed argument for increased value of the Emergency FTE (official announcement pending). They gathered the data needed to run the Emergency WLM and submitted that information to Health Authorities. Several Emergency Departments have benefitted in FHA; announcements are pending in other HAs
- We have updated our website (<https://www.sem-bc.com/>), with a new, more robust member's area.
- See a summary of some other of our efforts on your behalf in the attached White Paper Summary of SEM Year 2016-17

Work on your behalf by the SEM Executive requires sacrifice of our clinical income and of time and energy that could be spent with family and friends. We've continued to fight the good fight, and represent your interests to the best of our abilities.
